

ShipX **RATES**

Optimize your shipment sourcing options and reduce freight transportation costs with sophisticated ShipX® RATES solutions to proactively manage multi-modal freight rates and surcharges.

ShipXpress rail industry experts maintain rate and routing information for you in a secure database. You or your carriers can add rail, truck and barge rates to build multi-modal combinations.

The dynamic ShipX RATES database provides maximum flexibility for “What If” analysis and selection of optimal sourcing or supply plans.

ShipX RATES features include:

- Public and private rates information filtered by your specific Origin, Destination, commodity selections;
- Outsourcing of all rate data maintenance to ShipXpress rail experts;
- Support for Rule 11 and joint-line rates;
- One click addition of new lanes;
- Ability to maintain rail, truck and barge rates;
- Support for rail-truck-barge (cross-modal) transfers;
- Ability to evaluate your competitive position by comparing costs from your production points to a customer location against the costs incurred by your competitors to serve that same customer;
- Information that is simplified and presented in your preferred Unit of Measure.

With ShipX RATES, you have the tools you need to expertly manage your rates information for maximum cost savings *and* competitive intelligence that lets you strategically fine-tune your product offerings for better market position.
